Packing List

Before setting up your product, please make sure the following items have been shipped:

Item	Quantity
● BOXER-8130AI	1
● Power Adapter (Option)	1
● Power Cord (Option)	1
● Phoenix Power Connector	1
● Wallmount bracket	2

If any of these items are missing or damaged, please contact your distributor or sales representative immediately.

About this Document

This User's Manual contains all the essential information, such as detailed descriptions and explanations on the product's hardware and software features (if any), its specifications, dimensions, jumper/connector settings/definitions, and driver installation instructions (if any), to facilitate users in setting up their product.

Users may refer to the AAEON.com for the latest version of this document.

Safety Precautions

Please read the following safety instructions carefully. It is advised that you keep this manual for future references

1. All cautions and warnings on the device should be noted.
2. All cables and adapters supplied by AAEON are certified and in accordance with the material safety laws and regulations of the country of sale. Do not use any cables or adapters not supplied by AAEON to prevent system malfunction or fires.
3. Make sure the power source matches the power rating of the device.
4. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
5. Always completely disconnect the power before working on the system's hardware.
6. No connections should be made when the system is powered as a sudden rush of power may damage sensitive electronic components.
7. If the device is not to be used for a long time, disconnect it from the power supply to avoid damage by transient over-voltage.
8. Always disconnect this device from any AC supply before cleaning.
9. While cleaning, use a damp cloth instead of liquid or spray detergents.
10. Make sure the device is installed near a power outlet and is easily accessible.
11. Keep this device away from humidity.
12. Place the device on a solid surface during installation to prevent falls
13. Do not cover the openings on the device to ensure optimal heat dissipation.
14. Watch out for high temperatures when the system is running.
15. Do not touch the heat sink or heat spreader when the system is running
16. Never pour any liquid into the openings. This could cause fire or electric shock.

17. As most electronic components are sensitive to static electrical charge, be sure to ground yourself to prevent static charge when installing the internal components. Use a grounding wrist strap and contain all electronic components in any static-shielded containers.
18. If any of the following situations arises, please the contact our service personnel:
 - i. Damaged power cord or plug
 - ii. Liquid intrusion to the device
 - iii. Exposure to moisture
 - iv. Device is not working as expected or in a manner as described in this manual
 - v. The device is dropped or damaged
 - vi. Any obvious signs of damage displayed on the device
19. **DO NOT LEAVE THIS DEVICE IN AN UNCONTROLLED ENVIRONMENT WITH TEMPERATURES BEYOND THE DEVICE'S PERMITTED STORAGE TEMPERATURES (SEE CHAPTER 1) TO PREVENT DAMAGE.**

Warning!

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

Caution:

There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.

Attention:

Il y a un risque d'explosion si la batterie est remplacée de façon incorrecte. Ne la remplacer qu'avec le même modèle ou équivalent recommandé par le constructeur. Recycler les batteries usées en accord avec les instructions du fabricant et les directives gouvernementales de recyclage.

China RoHS Requirements (CN)

产品中有毒有害物质或元素名称及含量

AAEON Embedded Box PC/ Industrial System

部件名称	有毒有害物质或元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
印刷电路板 及其电子组件	○	○	○	○	○	○
外部信号 连接器及线材	○	○	○	○	○	○
外壳	○	○	○	○	○	○
中央处理器 与内存	○	○	○	○	○	○
硬盘	○	○	○	○	○	○
电源	○	○	○	○	○	○

O: 表示该有毒有害物质在该部件所有均质材料中的含量均在 SJ/T 11363-2006 标准规定的限量要求以下。

X: 表示该有毒有害物质至少在该部件的某一均质材料中的含量超出 SJ/T 11363-2006 标准规定的限量要求。

备注:

一、此产品所标示之环保使用期限, 系指在一般正常使用状况下。

二、上述部件物质中央处理器、内存、硬盘、电源为选购品。

China RoHS Requirement (EN)

Poisonous or Hazardous Substances or Elements in Products
AAEON Embedded Box PC/ Industrial System

Component	Poisonous or Hazardous Substances or Elements					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr(VI))	Polybrominated Biphenyls (PBB)	Polybrominated Diphenyl Ethers (PBDE)
PCB & Other Components	○	○	○	○	○	○
Wires & Connectors for External Connections	○	○	○	○	○	○
Chassis	○	○	○	○	○	○
CPU & RAM	○	○	○	○	○	○
Hard Disk	○	○	○	○	○	○
PSU	○	○	○	○	○	○

O: The quantity of poisonous or hazardous substances or elements found in each of the component's parts is below the SJ/T 11363-2006-stipulated requirement.

X: The quantity of poisonous or hazardous substances or elements found in at least one of the component's parts is beyond the SJ/T 11363-2006-stipulated requirement.

Note: The Environment Friendly Use Period as labeled on this product is applicable under normal usage only

Chapter 1

Product Specifications

1.1 Specifications

System

- CPU HMP Dual Denver 2/2 MB L2 + Quad ARM® A57/2 MB L2
- Chipset N/A
- System Memory 8 GB 128-bit LPDDR4, 59.7 GB/s
- Display Interface HDMI 2.0 x 1
- Storage Device Onboard 32GB eMMC (via Jetson TX2)
- Ethernet N/A
- I/O
 - USB Type A x 2 for USB 3.0
 - RJ-45 x 1 for GbE LAN Ethernet
 - DB-9 x 1 for RS-232
 - Remote on/off switch x 1
 - Antenna opening x 2
 - MicroSD x 1
 - OTG x 1
- Expansion
 - SATA x 1 (option)
 - USB 2.0 x 1 (option)
 - MIPI CSI-2 board-to-board connector (see 1.2 for note)
- Indicator N/A
- OS Support Linux Ubuntu 16.04

Mechanical

- **Mounting** Wallmount
- **Dimensions (W x H x D)** 153mm(W) x 30mm(H) x 101mm(D)
- **Gross Weight** 4.40 lbs. (2 kg)
- **Net Weight** 2.20 lbs. (1 kg)

Environmental

- **Operating Temperature** -4°F ~ 122°F(-20°C ~ 50°C,with 0.5 m/s AirFlow)
- **Storage Temperature** -13°F ~176 °F (-25°C ~ 80°C)
- **Storage Humidity** 95% @ 40°C, non-condensing
- **Anti-Vibration** Random, 5 Grm, 5~500Hz
- **Certification** CE/FCC class A

Power Supply

- **Power Requirement** DC 10~24 V

1.2 Product Notice

MIPI CSI-2: The connector used on the carrier board is a Samtec QSH-060-01-H-D-A. The mating connector is a Samtec QTH-060-01-H-D-A.

OTG: OTG port is ideally for flashing image only.

COM1: Support 1.8 meter length cable when baud rate 115200bps, and 15 meter cable when baud rate 9600bps.

USB ports: USB ports do not support USB DVD ROM because of file system.

LAN LED Status for 10/100 BASE-T is not supported.

LAN LED Indicator Behavior

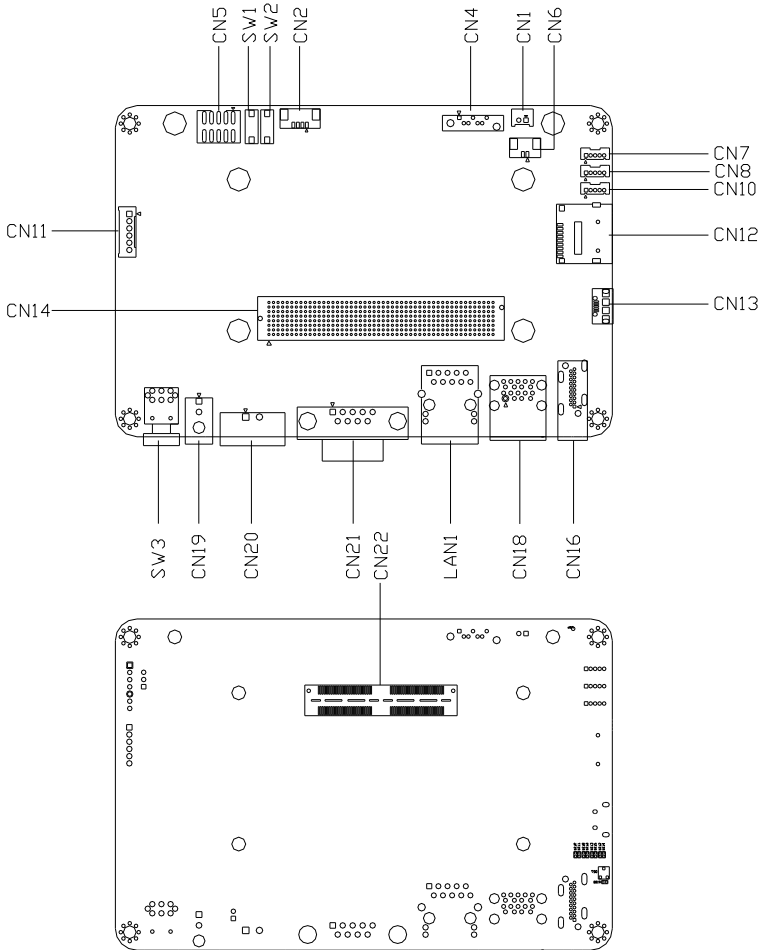

Chapter 2

Hardware Information

2.1 Dimensions

2.2 Jumpers and connectors

2.3 List of Jumpers

The board has a number of jumpers that allow you to configure your system to suit your application.

The table below shows the function of each of the board's jumpers

Label	Function
CN17	AT mode select

2.3.1 Setting Jumpers

You configure your card to match the needs of your application by setting jumpers. A jumper is the simplest kind of electric switch. It consists of two metal pins and a small metal clip (often protected by a plastic cover) that slides over the pins to connect them.

To “close” a jumper you connect the pins with the clip.

To “open” a jumper you remove the clip. Sometimes a jumper will have three pins, labeled 1, 2 and 3. In this case you would connect either pins 1 and 2 or 2 and 3.

A pair of needle-nose pliers may be helpful when working with jumpers.

If you have any doubts about the best hardware configuration for your application, contact your local distributor or sales representative before you make any change.

Generally, you simply need a standard cable to make most connections.

2.3.2 Auto Power Button (CN17)

Disable(Default)

Enable

CN17	Function
1-2	Open ATX (Default)
1-2	Close AT

2.4 List of Connectors

The board has a number of connectors that allow you to configure your system to suit your application.

The table below shows the function of each of the board's connectors

Label	Function
CN1	SATA PWR connector
CN2	FAN connector
CN4	SATA connector
CN6	RTC battery connector
CN7	USB 2.0 connector
CN8	USB 2.0 connector
CN10	USB 2.0 connector
CN11	Debug port connector
CN12	Micro SD connector
CN13	USB 2.0 OTG
CN14	TX2 Module connector
CN16	HDMI connector
CN18	USB 3.0 x 2
CN19	Remote button cable connector
CN20	Power In connector
CN21	COM 1
CN22	CSI x 6 connector
SW1	H/W Reset switch
SW2	Recovery switch
SW3	Power switch
LAN1	GIGA LAN 1

2.4.1 SATA PWR Port (CN1)

Chapter 3

OS Flash guide

3.1 Force USB Recovery Mode

To place system in Force USB Recovery Mode:

1. Power down the device. If connected, remove the AC adapter from the device. The device MUST be powered OFF, not in a suspend or sleep state.
2. Connect the Micro-B plug on the USB cable to the Recovery (USB Micro-B) Port on the device and the other end to an available USB port on the host PC.
3. Connect the power adapter to the device.
4. Press and release the POWER button to power on device. Press and hold the FORCE RECOVERY button: while pressing the FORCE RECOVERY button, press and release the RESET button; wait two seconds and release the FORCE RECOVERY button.; For the location of the buttons, refer to Chapter 2 Hardware Information.
5. When device is in recovery mode, lsusb command on host will list a line of "Nvidia Corp"

3.2 Software & BSP

Please follow the steps below to install the test image.

(1) Download `Ubuntu_16.04_UB1604D.NV02.BOXER-8110AI.TB1.zip` image. Please check with your local sales or FAE for the test image. The file name might be changed without notice.

(2) Unzip `Ubuntu_16.04_UB1604D.NV02.BOXER-8110AI.TB1.zip`
`unzip Ubuntu_16.04_UB1604D.NV02.BOXER-8110AI.TB1.zip`

(3) Enter bootloader folder
`cd bootloader`

(5) Enter Force USB Recovery Mode. For the way to enter Force USB Recovery Mode, please refer to "Force USB Recovery Mode"

(6) Exec the following command to install image:
`sudo ./flashall.sh`
